VIA HAND DELIVERY

Luly Massaro, Commission Clerk
Public Utilities Commission
89 Jefferson Boulevard
Warwick, RI 02888

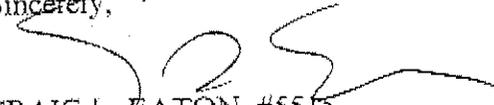

RECEIVED
2003 SEP -2 PM 3:49
PUBLIC UTILITIES COMMISSION

Re: Docket No. 3436; Annual Gas Cost Recovery Filing

Dear Luly:

Enclosed is an original and nine copies of the testimony of Michael Harm and Gary Beland in support of the above referenced filing. Please note that these proposed rates reflect the class-specific factors necessary for New England Gas Company to collect projected gas costs for the period November, 2003 through October, 2004. Thank you for your attention to this filing.

Sincerely,

CRAIG L. EATON, #5515
Attorney for New England Gas Company
CLE/kmb

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
PUBLIC UTILITIES COMMISSION

NEW ENGLAND GAS COMPANY
DOCKET NO. 3436

DIRECT TESTIMONY

OF

MICHAEL J. HARN

September 2, 2003

1 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2 A. My name is Michael J. Harn. My business address is 100 Weybosset Street,
3 Providence, RI 02903.

4 **Q. WHAT IS YOUR POSITION AND RESPONSIBILITIES?**

5 A. I am a Pricing Analyst for the New England Gas Company (“NEGC” or the
6 “Company”). My responsibilities include the preparation of the Company’s Gas Cost
7 Recovery (GCR) filings, rate and revenue analysis, and other rate-related issues.

8 **Q. WHAT IS YOUR PROFESSIONAL AND EDUCATIONAL BACKGROUND?**

9 A. From 1985 to 1987, I was employed as a Labor Market Economist by the
10 Commonwealth of Massachusetts – Department of Employment and Training. My
11 responsibilities at the Department included the analysis of re-employment by workers
12 affected by mass layoffs and plant closings. I joined Bay State Gas Company in
13 November 1987 as an Associate Rate Analyst, and was promoted to the position of
14 Rate Analyst in February 1995. While at Bay State, I testified before the New
15 Hampshire Public Utility Commission and Maine Public Utility Commission in Cost
16 of Gas Adjustment Filings. In April 1998, I joined ProvEnergy as a Pricing Analyst.
17 My educational background includes a Bachelor of Arts Degree in Economics from
18 Framingham State College.

19 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?**

1 A. The purpose of my testimony is to explain the calculation of the Gas Cost Recovery
2 ("GCR") charges to be effective with consumption on and after November 1, 2003 for
3 the following services: (1) firm sales service to the Residential Non-Heating and
4 Heating rate classes and Commercial and Industrial ("C&I") customers in the Small,
5 Medium, Large and Extra Large rate classes; and (2) Gas Marketer Charges and
6 factors associated with transportation services billed to Gas Marketers. My testimony
7 will also address the Natural Gas Vehicle ("NGV") rate, the BTU conversion factor
8 for the upcoming winter, and miscellaneous GCR tariff changes.

9 **Q. DO YOU HAVE ANY ATTACHMENTS TO YOUR TESTIMONY?**

10 A. Yes. I am sponsoring the following Attachments:

11 MJH-1 Gas Cost Recovery Schedules
12 MJH-2 GCR Reconciliation Filing
13 MJH-3 Bill Impacts
14 MJH-4 Gas Cost Recovery Schedules w/ Mitigation
15 MJH-5 NGV Tariff
16 MJH-6 Marketer Transportation Factors
17 MJH-7 BTU Conversion Factor
18 MJH-8 GCR Tariff
19

20 **Q. PLEASE PROVIDE AN OVERVIEW OF THE DEVELOPMENT OF THE**
21 **PROPOSED GCR RATES.**

22 A. The proposed GCR rates reflect the class-specific factors necessary for the Company
23 to collect projected gas costs for the period November 2003 through October 2004.
24 As shown in the testimony of Mr. Beland on Attachment GLB-1, gas costs are
25 projected to be \$204,319,367 for the twelve-month period ending October 2004. In

1 addition to these costs, the GCR factors are designed to recover Working Capital costs
2 of \$869,834 (Attachment MJH-1, pages 10-12), Inventory Financing costs of
3 \$2,301,410 (Attachment MJH-1, page 13), the Prior Period Deferred Balance of
4 \$19,898,357 (Attachment MJH-1, pages 6-9) (as calculated based on actual data
5 through July 2003 and forecast data for the period August 2003 through October
6 2003), LNG Operation and Maintenance Costs of \$884,360 (consistent with the
7 Commission's findings in Docket 3401), and a credit of \$1,615,497 associated with
8 LNG costs that will be collected through the Distribution Adjustment Clause ("DAC")
9 factor. In total, the GCR factors are designed to recover \$226,657,831 in gas costs
10 during the period November 2003 through October 2004.

11 **Q. ATTACHMENT MJH-1, PAGE 1 SHOWS A RESIDENTIAL AND SMALL**
12 **C&I GCR FACTOR OF \$8.1948/DTH. PLEASE EXPLAIN HOW THE**
13 **COMPANY DERIVED THIS FACTOR.**

14 A. The residential GCR factor of \$8.1948/dth consists of five cost components and an un-
15 collectible component. The five cost components are Supply Fixed, Storage Fixed,
16 Supply Variable, Storage Variable Product and Storage Variable Non-Product. The
17 associated rate components are \$0.9616/dth, \$0.3822/dth, \$5.6838/dth, \$0.9210/dth,
18 and \$0.0741/dth, respectively.

19 The derivation of the Supply Fixed component is reflected on Attachment MJH-1, at
20 page 2. As shown, Supply Fixed costs total \$28,312,711 (see also Attachment GLB-1:

1 pipeline demand costs of \$28,104,637, plus supplier demand costs of \$2,488,228, less
2 marketer release revenues of \$2,280,154). Fixed gas costs are also reduced by
3 capacity-release revenues of \$860,800. Working capital costs of \$118,202 associated
4 with Supply Fixed costs are added (MJH-1, page 10), as is the prior period Supply
5 Fixed gas cost over-collection of \$913,115, resulting in Total Supply Fixed gas costs
6 of \$26,656,998, to be collected over the period November 2003 through October 2004.
7 Because the Company's supply planning is based upon having sufficient capacity to
8 meet the needs of firm sales customers under design winter conditions, Supply Fixed
9 costs (as well as Storage Fixed costs) are allocated to the various rate classes based on
10 their proportion of design-winter use. As shown, the percentage of Residential and
11 Small C&I design sales to total design sales is 78.83%. Therefore, 78.83% of the total
12 Supply Fixed gas costs, or \$21,014,914, is allocated to the Residential and Small C&I
13 customer class. Dividing this amount by the November 2003 through October 2004
14 forecasted consumption of customers in the Residential and Small C&I class results in
15 a Supply Fixed cost component of \$0.9616/dth.

16 **Q. HOW DID THE COMPANY DERIVE THE STORAGE FIXED COST**
17 **FACTOR COMPONENT FOR THE RESIDENTIAL AND SMALL C&I**
18 **CLASS?**

19 **A.** The derivation of the Storage Fixed cost factor is demonstrated on Attachment MJH-1,
20 at page 3. As shown, Storage Fixed costs total \$10,851,476 (see Attachment GLB-1).
21 Deducted from this amount are \$694,328 of LNG demand costs allocated to the DAC.

1 Added to this amount are \$518,894 of supply-related LNG operations and
2 maintenance costs, \$45,969 of working capital costs associated with Storage Fixed
3 costs (Attachment MJH-1, page 10), and the prior period under-collection associated
4 with Storage Fixed costs of \$99,259. Therefore, total Storage Fixed costs to be
5 collected over the period November 2003 through October 2004 amount to
6 \$10,821,270. As with Supply Fixed costs, the Storage Fixed costs are allocated on the
7 basis of design winter throughput. Therefore, 77.19%, or \$8,353,042 of total Storage
8 Fixed gas costs are allocated to the Residential and Small C&I customer class.
9 Dividing this amount by forecasted period sales of 21,853,873 Dths results in the
10 Storage Fixed component of \$0.3822/dth.

11 **Q. THE COMPANY ALLOCATED SUPPLY FIXED COSTS BASED ON 78.83%**
12 **PERCENT OF RESIDENTIAL AND SMALL C & I DESIGN SALES. WHY IS**
13 **THE COMPANY USING A PERCENTAGE OF 77.19% FOR ALLOCATING**
14 **STORAGE FIXED COSTS?**

15 **A.** A portion of Storage Fixed costs are required to meet the needs of FT-2 customers.
16 Therefore, the projected throughput has been adjusted to reflect consumption by FT-2
17 customers. Attachment MJH-5, page 2 reflects the development of the FT-2 Marketer
18 Charge and the allocation of Storage Fixed costs to this class of customers.

19 **Q. WHY DOES THE COMPANY ASSIGN A PORTION OF STORAGE FIXED**
20 **COSTS TO FT-2 CUSTOMERS?**

1 A. Consistent with the methodology established and approved by the Commission in
2 Docket No. 2552, the FT-2 rate is based on the development of the storage and
3 peaking costs as described in the GCR tariff. The fixed and variable costs relate to the
4 operations, maintenance, and delivery of the Company's storage resources, along with
5 requirements for purchased gas working capital.

6 **Q. HOW DID THE COMPANY DERIVE THE SUPPLY VARIABLE COST**
7 **COMPONENT FOR THE RESIDENTIAL AND SMALL C&I CUSTOMER**
8 **CLASS?**

9 A. The Supply Variable cost component is \$5.6838/dth for all customer classes, including
10 the Residential and Small C&I customer class. Attachment MJH-1, page 4 reflects the
11 derivation of the \$5.6838/dth Supply Variable cost component. As shown, projected
12 variable supply costs are \$142,185,226 (see Attachment GLB-1). Deducted from this
13 amount are variable delivery storage costs of \$239,315, variable injection storage costs
14 of \$41,236, and fuel costs allocated to storage of \$1,292,924, resulting in total
15 deductions of \$1,573,474. These costs have been transferred to the Storage Variable
16 Non-Product gas-cost category. Added to this amount are working capital costs
17 associated with Supply Variable costs of \$605,445 (MJH-1, page 11) and the prior
18 period under-collection associated with Supply Variable costs of \$19,736,088.
19 Therefore, total Supply Variable costs for the period November 2003 through October
20 2004 are \$160,953,285. Dividing this amount by projected period sales of 28,317,844
21 results in the Supply Variable cost factor of \$5.6838/Dth.

1 **Q. WHY DIDN'T THE COMPANY ALLOCATE THESE COSTS ON THE BASIS**
2 **OF DESIGN THROUGHPUT, AS IT DID WITH THE SUPPLY FIXED AND**
3 **STORAGE FIXED COMPONENTS?**

4 A. Supply Variable costs vary with the amount of gas actually consumed by customers,
5 and therefore, are allocated to the various rate classes based on the projected
6 consumption by customers in each rate class.

7 **Q. HOW DID THE COMPANY DERIVE THE STORAGE VARIABLE**
8 **PRODUCT COST FACTOR ASSOCIATED WITH THE RESIDENTIAL AND**
9 **C&I SMALL CUSTOMER CLASS?**

10 A. The derivation of the Storage Variable Product cost factor is shown in Attachment
11 MJH-1, page 5. As shown, projected Storage Variable Product costs are \$22,648,886.
12 Deducted from this amount are \$921,168 of balancing-related LNG costs that are
13 collected through the DAC. Added to this amount are \$365,465 of supply-related
14 LNG O&M costs (as per the Commission's findings in Docket 3401); \$95,129 of
15 working capital costs (MJH-1, page 11); inventory financing costs of \$452,543,
16 \$1,816,446, and \$32,421 for LNG, underground storage and liquid propane,
17 respectively (MJH-1, page 13); and the prior period under-collection of \$1,590,120.
18 Therefore, the total Storage Variable costs to be collected over the period November
19 2003 through October 2004 are \$26,079,842. Dividing this amount by the forecasted
20 sales for the period of 28,317,844 Dths results in a Storage Variable Product cost
21 factor of \$0.9210/dth.

1 **Q. HOW DID THE COMPANY DERIVE THE STORAGE VARIABLE NON-**
2 **PRODUCT COST FACTOR ASSOCIATED WITH THE RESIDENTIAL AND**
3 **C&I SMALL CUSTOMER CLASS?**

4 A. The derivation of the Storage Variable Non-Product cost factor is shown in
5 Attachment MJH-1, page 5. As shown, projected Storage Variable Non-Product costs
6 are \$1,181,867. Added to this amount are variable delivery storage costs of \$239,315,
7 variable injection costs of \$41,236, and fuel costs allocated to storage of \$1,292,924.
8 Also, working capital costs of \$5,089 and the prior period over-collection of \$613,995
9 are added, resulting in total Storage Variable Non-Product costs of \$2,146,435 to be
10 collected over the period November 2003 through October 2004. Dividing this
11 amount by forecasted throughput for the period of 28,966,726 Dth results in a Storage
12 Variable Non-Product cost factor of \$0.0741/Dth.

13 **Q. WHY WERE THE STORAGE VARIABLE NON-PRODUCT COSTS DIVIDED**
14 **BY FORECASTED THROUGHPUT OF 28,966,726 DTH, WHILE STORAGE**
15 **VARIABLE PRODUCT COSTS AND SUPPLY VARIABLE COSTS WERE**
16 **DIVIDED BY FORECASTED SALES OF 28,317,844 DTH?**

17 A. Similar to the derivation of the Storage Fixed cost factor, a portion of Storage Variable
18 Non-Product costs are associated with the delivery of underground storage for FT-2
19 marketers. Therefore, a portion of the Storage Variable Non-Product costs are
20 assigned to FT-2 marketers (see Attachment MJH-5).

1 In summary, the Residential and Small C&I GCR factor of \$8.1948/Dth consists of a
2 Supply Fixed component of \$0.9616/Dth, a Storage Fixed component of \$0.3822, a
3 Supply Variable component of \$5.6838, a Storage Variable Product component of
4 \$0.9210 and a Storage Variable Non-Product cost component of \$0.0741. The total of
5 these gas-cost components is \$8.0227/Dth. Adjusting this rate by the uncollectible
6 percentage rate of 2.10 results in the proposed Residential and Small C&I GCR factor
7 of \$8.1948/Dth.

8 **Q. HOW DID THE COMPANY DERIVE THE GCR FACTORS FOR THE**
9 **OTHER CUSTOMER CLASSES?**

10 A. The GCR factors for the remaining customer classes are calculated in the same manner
11 as the calculation for the Residential and Small C&I customer classes.

12 **Q. WHAT IS THE COMPANY'S ESTIMATE OF THE DEFERRED GAS COST**
13 **BALANCE AT THE END OF THE CURRENT GCR PERIOD (OCTOBER 31,**
14 **2003)?**

15 A. The Company's current estimate is that there will be an under-collection of
16 approximately \$19.9 million in the deferred gas cost account at the end of October
17 2003. This estimate is based on: (1) the actual deferred balance at the end of June, as
18 reflected in the Company's annual GCR reconciliation filed with the Division and the
19 Commission on August 1, 2003; (2) preliminary actual data for July 2003; and (3) the
20 most recent projections for the period August 2003 through October 2003, using the

1 current GCR factors and the most recent estimate of gas costs. A copy of the GCR
2 reconciliation filing is attached here as Attachment MJH-2 and the updated deferred
3 gas cost balance projections for July 2003 through October 2003 are provided in
4 Attachment MJH-1 at pages 6-9.

5 **Q. DID THE COMPANY INCLUDE THE TOTAL DEFERRED BALANCE IN**
6 **THE GCR FACTORS DISCUSSED ABOVE?**

7 A. Yes. The Company computed the GCR factors for all customer classes to include the
8 recovery of the total estimated deferred balance as of October 31, 2003 of \$19.9
9 million.

10 **Q. WHAT WAS THE PRIMARY CAUSE OF THE \$19.9 MILLION UNDER-**
11 **COLLECTION?**

12 A. An under-collection of \$19.9 million developed because gas costs during last winter
13 were greater than forecasted. These greater costs resulted from an increase in
14 NYMEX gas prices and increased customer consumption resulting from the cold
15 weather. Attachment MJH-2 is a copy of a report submitted on August 1, 2003
16 identifying the reasons for the under-collection through June 30, 2003.

17 **Q. IN THE AUGUST 1, 2003 REPORT, THE COMPANY PREPARED AN**
18 **ANALYSIS THAT ALLOCATED THE DEFERRED BALANCE TO EACH**
19 **CUSTOMER CLASS BASED ON A COMBINATION OF FOREGASTED GAS**

1 **USE AND ACTUAL CONSUMPTION. DID THE COMPANY USE THE**
2 **SAME APPROACH IN DEVELOPING THE GCR FACTORS PROPOSED IN**
3 **THIS FILING?**

4 A. No. In the August 1, 2003 Report, the Company set forth an analysis that allocated the
5 deferred gas balance on the basis of forecasted use for those volumes falling under the
6 purchase plan, and actual consumption for those volumes falling outside of the
7 purchase plan. The Company submitted the August 1 analysis in response to a request
8 from the Commission, as set forth in Section III, page 24 of Order No. 17444, which
9 directed the Company "to perform and file a class-specific reconciliation of the
10 deferred gas cost balance for the period July 1, 2002 through October 31, 2003."

11 However, the Company's tariff currently requires a calculation that involves
12 forecasted gas use (see, e.g., Section 2, Schedule A). Therefore, the GCR factors
13 proposed in this filing reflect the allocation of the deferred balance to each customer
14 class on the basis of forecasted consumption, rather than actual consumption.
15 Attachment MJH-2(a) presents a cost comparison of each allocation method. As
16 shown, the allocation of the deferred balance to each customer class on the basis of
17 forecasted throughput results in approximately \$1.8 million less of the deferral being
18 allocated to the Residential and Small C&I customer class, which will serve to
19 mitigate bill impacts for the upcoming GCR period.

1 Q. PLEASE DESCRIBE THE DEVELOPMENT OF THE FORECASTED
2 THROUGHPUT REQUIREMENTS.

3 A. Development of the forecasted throughput requirements started with the historical
4 actual monthly number of customers and associated gas consumption by rate class.
5 This encompassed both the time prior to, and during which, the Company has operated
6 under the state-wide consolidated tariff. The historical consumption data was weather
7 normalized to reflect the 10-year average of 5,463 degree days established in the
8 Company's last rate case, Docket No. 3401. The Company's marketing group then
9 used the historical data, along with their knowledge of any specific projects likely to
10 occur, as well as general econometric data like housing starts and other data to develop
11 customer growth rates for each rate class. The rate-class throughput forecast was then
12 calculated for the upcoming GCR period using historic average use per customer for
13 the various rate classes. For the extra-large rate class, the marketing group projected
14 the monthly consumption on a customer-by-customer basis. These customers are the
15 Company's largest customers with each account having annual consumption in excess
16 of 15,000 Dth. Although there are less than 100 customers in this group, these
17 customers account for approximately 12 percent of the Company's annual firm
18 throughput. The Company's marketing group is generally familiar with these
19 customers and their operations and is able to provide input regarding their load
20 requirements in the planning process.

1 **Q. WHAT LEVEL OF MIGRATION FROM SALES SERVICE TO**
2 **TRANSPORTATION SERVICE DID THE COMPANY REFLECT IN THE**
3 **FORECAST?**

4 A. As discussed with the Division, the forecast does not include any migration from sales
5 service to transportation service, or from transportation service to sales service. The
6 actual number of transportation customers on July 31, 2003 was held constant
7 throughout the forecast. However, the Company will adjust its GPIP forecast if the
8 net change in monthly marketer aggregation pool pipeline-capacity assignments is
9 equal to or greater than 1% of the Company's comparable requirements.

10 **Q. HAS THE COMPANY ANALYZED THE BILL IMPACTS OF THE**
11 **PROPOSED CHANGES FOR CUSTOMERS?**

12 A. Yes. If the proposed GCR factors were to take effect, a residential heating customer
13 using 1,035 therms per year would experience an increase of approximately 7.0
14 percent, or \$85 per year (\$7 per month). A summary of bill impacts for customers and
15 the detailed calculations are provided on Attachment 3. In addition to the proposed
16 GCR factors, the bill-impact analysis also incorporates the proposed reduction in DAC
17 factors effective November 1, 2003 (Docket 3459). The proposed DAC factors will be
18 submitted in a separate filing.

19 **Q. HAS THE COMPANY CONSIDERED ANY OPTIONS THAT COULD**
20 **MITIGATE THE IMPACT ON CUSTOMERS.**

1 A. Yes. The Company has carefully reviewed the bill impacts to residential heating
2 customers of the projected gas costs and the recovery of the deferred fuel balance. As
3 reflected on Attachment MJH-3, at page 1, full recovery of the GCR deferred balance
4 results in a 7.0% increase in bills for customers in the Residential Heating class. The
5 component of this increase attributable to the recovery of projected gas costs is
6 approximately 3%, while the component attributable to the recovery of the projected
7 deferred balance is approximately 6%. As a result, the Company is proposing to
8 mitigate bill impacts by setting a limit on the year-end deferred fuel balance to be used
9 in this and all future GCR filings.

10 **Q. DOES THE COMPANY HAVE A POSITION ON THE RECOVERY OF**
11 **PROJECTED GAS COSTS?**

12 A. Yes, the Company believes that, consistent with Commission policy and practice, the
13 GCR factor effective November 1, 2003 should (at least) be designed to recover
14 projected gas costs during the 12-month period ending October 31, 2004. The impact
15 to residential heating customers of this proposal would be a 3% increase in the GCR.

16 **Q. HOW DOES THE COMPANY PROPOSE TO MITIGATE BILL IMPACTS**
17 **GIVEN THE NEED TO ESTABLISH GCR FACTORS THAT COLLECT**
18 **PROJECTED GAS COSTS FOR THE PERIOD IN WHICH THE FACTOR IS**
19 **EFFECTIVE?**

1 A. Because the Company believes it is important to set and maintain GCR factors that are
2 designed to recover at least the costs projected for the current period, the Company
3 would propose to design the GCR factors to recover only that portion of the deferral
4 balance that exceeds a threshold of 5% of projected gas costs for the period. Since the
5 deferred fuel balance existing at the time of this filing is approximately equal to 10%
6 of projected gas costs, the Company requests approval to recover only 50% of the
7 deferred fuel balance in the up-coming GCR period, and to defer the remaining 50% to
8 the following GCR period. This would reduce the impact of the recovery of the
9 deferred balance on the typical residential heating customer from 6% to 3%.

10 In addition, the Company proposes that any time the period-end deferred fuel balance
11 is expected to be greater than 5% of gas costs, the Company would file an adjustment
12 to the GCR factor that would be designed to either eliminate the deferred balance in
13 the current period, or to update the GCR factors so that no more than 5% of period
14 costs would be deferred until the following year.

15 **Q. ARE THERE ANY OTHER FACTORS THAT WOULD MITIGATE THE**
16 **RECOVERY OF 50% OF THE DEFERRED FUEL BALANCE?**

17 A. Yes. The Company filed on August 1, 2003 to decrease the DAC component of a
18 typical residential customer bill by 1% primarily because of the return of weather-
19 normalization revenues. In addition, the Company filed a revision to the DAC for
20 effect on November 1, 2003 that will reduce customer bills an additional 1% primarily
21 because of the results of the earnings-sharing revenues that are being returned to

1 customers. The combination of the decreases in the DAC and the proposed recovery
2 of 50% of the deferred fuel balance will result in an incremental increase to the typical
3 bill of a residential heating customer of 1%. This impact, combined with the 3%
4 increase associated with the recovery of projected gas costs for the forecast period,
5 would result in a total bill impact for Residential Heating customers of approximately
6 4%.

7 **Q. WHAT IS THE IMPACT OF THE PROPOSAL TO RESIDENTIAL HEATING**
8 **CUSTOMERS?**

9 A. Attachment MJH-4, page 1 presents the alternative GCR Factors for effect November
10 1, 2003. These alternative factors are designed to collect only 50% of the prior period
11 deferred balances. As shown, the proposed alternative GCR factor for Residential
12 Heating customers is \$7.8360/Dth, or \$0.3588 less than the proposed factor that
13 includes 100% recovery of the deferred balances. Page 2 of MJH-4 summarizes the
14 class-specific bill impacts employing the alternative GCR factors and the November 1,
15 2003 proposed DAC Factors. As stated above, these factors would produce a 4%
16 increase to Residential Heating customer bills. Page 3 of MJH-4 summarizes the
17 Deferred Mitigation percent bill impacts for a typical Residential Heating customer.

18 **Q. IS THE COMPANY PROPOSING A CHANGE TO THE NATURAL GAS**
19 **VEHICLE ("NGV") RATE?**

1 A. Yes. The commodity charge component of the NGV rates is based on the supply
2 variable costs identified in the Company's GCR filing. Accordingly, the NGV
3 commodity charge is being updated to reflect the supply variable costs included in this
4 filing. A revised NGV tariff is provided as Attachment MJH-5.

5 **Q. WHAT ARE THE VARIOUS GAS MARKETER CHARGES AND FACTORS**
6 **INCLUDED IN THIS GCR FILING?**

7 A. The gas marketer charges and factors covered under the Company's GCR tariff and
8 included in this GCR filing are: (1) the FT-2 firm transportation marketer gas charges;
9 (2) Pool Balancing Service charges; and (3) the Company's weighted average pipeline
10 cost and the associated credits/surcharges applied to marketers for pipeline capacity
11 assignments. A summary of the proposed charges that would take effect concurrent
12 with the updating of transportation factors and capacity releases on November 1, 2003
13 are shown on Attachment MJH-6, page 1.

14 **Q. PLEASE DESCRIBE THE DEVELOPMENT OF THE FT-2 FIRM**
15 **TRANSPORTATION RATE FOR STORAGE AND PEAKING RESOURCES.**

16 A. Consistent with the methodology established and approved by the Commission in
17 Docket No. 2552, the FT-2 rate is based on the development of the storage and
18 peaking costs as described in the GCR tariff. The fixed and variable costs related to
19 the operations, maintenance and delivery of the Company's storage resources were
20 totaled, along with requirements for purchased gas working capital. The result was

1 then divided by the forecasted firm throughput to arrive at a per therm cost. The
2 proposed rate of \$0.0421 per therm is comparable to the current rate of \$0.0439 per
3 therm. Attachment MJH-6, page 2 demonstrates the calculation of the \$0.0421 per
4 therm FT-2 Marketer Charge.

5 **Q. PLEASE DESCRIBE THE UPDATE OF THE POOL BALANCING SERVICE**
6 **CHARGE.**

7 A. Pursuant to Item 5.04.1 of the Transportation Terms and Conditions and consistent
8 with the methodology established in Item 4.2 of the GCR, the Pool Balancing Charge
9 is being updated to reflect the relevant Fixed and Storage Cost components. As shown
10 on Attachment MJH-6, page 1, the proposed balancing charge is \$0.0021 per
11 percentage of balancing elected per therm of throughput in the Marketer pool.

12 **Q. HAS THE COMPANY UPDATED THE CHARGES ASSOCIATED WITH**
13 **TRANSPORATION SERVICE RELATED PIPELINE CAPACITY**
14 **ASSIGNMENT?**

15 A. Yes. The updated weighted average pipeline cost is shown on Attachment MJH-6,
16 page 1. The testimony of Company witness Mr. Gary Beland describes its calculation
17 and the calculation of the associated credits/surcharges applied to marketers for
18 pipeline capacity assignments.

1 Q. HAS THE COMPANY CALCULATED THE BTU CONVERSION FACTOR
2 FOR THE PEAK PERIOD NOVEMBER 2003 THROUGH APRIL 2004?

3 A. Yes. The actual weighted system average decatherms (Dth) per thousand cubic feet
4 (Mcf) for last year's peak period, November 2002 through April 2003, was 1.029 Dth.
5 Consistent with the provisions in the Company's tariff, that will serve as the basis for
6 the conversion of volumetric readings to Btu's or therms (1 therm = 100,000 Btu) in
7 the upcoming peak period, November 2003 through April 2004. For example, a meter
8 reading of 100 Ccf will equate to 102.9 therms, or 10 Mcf will be 10.29 Dth. The
9 calculation of that factor is provided on Attachment MJH-7.

10 Q. IS THE COMPANY PROPOSING ANY MISCELLANEOUS CHANGES TO
11 THE GCR TARIFF?

12 A. Yes. Consistent with the Commission approval of the Gas Procurement and Asset
13 Management Incentive Plan in Docket No. 3436, Order No. 17444, the GCR Tariff,
14 Section 2, Schedule A needs to be updated. Specifically, the description of the fixed
15 supply and fixed storage calculation in Items 3.1 and 3.2 is being updated to include a
16 reference to the asset-management incentive. Similarly, the supply variable
17 description in Item 3.3 is incorporating a reference to the gas procurement incentive.
18 Additionally the proposed tariff includes a correction to the GCR effective date in
19 Item 1.2 and in Item 3, the date of the deferred gas cost is changed to reflect October
20 31 rather than September 30. A redlined and clean copy of the Section 2 Schedule A
21 GCR tariff is provided as Attachment MJH-8.

1 Q. DOES THIS CONCLUDE YOUR TESTIMONY?

2 A. Yes.

New England Gas Company

August 1, 2003

Mr. Stephen Scialabba
 R.I. Division of Public Utilities and Carriers
 89 Jefferson Blvd.
 Warwick, R.I. 02999

Re: Dkt 3436: 2002-03 Gas Cost Recovery (GCR) Reconciliation &
 Deferred Responsibility Analysis

Dear Mr. Scialabba:

Attached are an original and nine copies of New England Gas Company's 2002-03 GCR reconciliation analysis. The reconciliation analysis is organized as follows:

Attachment 1, pages 1 and 2, presents the gas cost-specific over/under-collection balances for the period July 2002 through June 2003, resulting in an end-of-period under-collection of \$10,743,042 through June 30, 2003 (as shown on the bottom of page 2). The \$10,743,042 under-collection reflects the originally approved GCR factors for the period July 1, 2002 through March 31, 2003, and amended GCR factors for the period April 1, 2003 through June 30, 2003. Significantly colder-than-normal weather and greater-than-forecast gas prices for the period December 2002 through March 2003, prompted the interim GCR filing in March 2003.

The \$10,743,042 deferred balance is comprised of five distinct cost components: (a) Supply Fixed, (b) Storage Fixed, (c) Supply Variable, (d) Storage Variable Product, and (e) Storage Variable Non-product. Total Supply Fixed costs totaled \$25,845,172, while collections were \$32,759,315. Interest on the monthly over/under-collection balances totaled \$1,028. Adjusting for the \$394,422 beginning deferred balance results in the ending Supply Fixed Cost over-collection of \$6,518,692. Storage Fixed Costs totaled \$9,276,511 while collections totaled \$11,657,382. Monthly interest on the deferred balances totaled (\$1,450). Adjusting for the \$142,241 beginning deferred balance results in the \$2,240,080 Storage Fixed Cost over-collection. Supply Variable costs totaled \$137,289,641. Supply Variable collections totaled \$121,674,906, resulting in a \$17,196,297 end-of-period under-collection (adjusting for interest of \$242,282, deferred responsibility credits of \$3,059, and the beginning deferred balance of \$1,342,339). Storage Variable Product Costs totaled \$23,613,275. Storage Variable Product collections were \$20,836,076, resulting in a \$3,055,265 under-collection (adjusting for interest of \$50,390 and beginning deferred balance of \$227,676). Lastly, Storage Variable Non-product Costs totaled \$1,368,722, while collections totaled \$2,140,121. Interest on the monthly over/under-collection balances totaled (\$8,980).

RECEIVED
 2003 AUG - 1 PM 3:36
 PUBLIC UTILITIES COMMISSION

Adjusting for the beginning deferred balance of \$30,631 results in an ending Storage Variable Non-product over-collection of \$749,747.

In summary, period gas costs totaled \$197,390,262 while period gas cost collections totaled \$189,067,800. Interest on the monthly over/under-collection balances totaled \$283,270. Accounting for the \$2,137,309 beginning deferred balance results in the \$10,743,042 under-collection at June 30, 2003.

Attachment 2, pages 1 and 2 summarize monthly gas costs according to the five components previously mentioned. Attachment 3 presents the calculation of inventory financing costs. For the twelve months ended June 2003, underground storage financing costs totaled \$1,255,104, LNG inventory storage financing costs totaled \$414,087, and LP inventory financing costs totaled \$3,205. Of the \$414,087 of LNG inventory financing costs, \$84,432 is associated with system balancing, and therefore, are allocated to the Distribution Adjustment Clause (DAC) account. Thus, \$329,655 of LNG inventory financing costs are associated with the GCR. Working Capital costs are calculated and demonstrated in Attachment 4, pages 1 through 3. As shown on Page 1 of Attachment 4, working capital costs associated with Supply Fixed costs totaled \$110,807, and \$39,771 associated with Storage Fixed costs. The working capital cost associated with Supply Variable costs totaled \$588,606 while Storage Variable Product Cost working capital totaled \$88,587 (page 2). Storage variable non-product working capital costs totaled \$5,868 and is shown on page 3 of Attachment 4. The inventory financing costs and working capital cost calculations are consistent with the methodology approved in Docket 3401.

Monthly firm thru-put is summarized in Attachment 5. Firm sales totaled 30,359,399 dths, FT-2 thru-put totaled 779,997 dths and FT-1 thru-put totaled 6,197,926 dths, resulting in total firm thru-put of 37,337,322 dths.

Gas Cost Collections are summarized in Attachment 6, pages 1 and 2. As previously mentioned, gas cost collections for the period July 2002 through March 2003 are predicated on the originally approved GCR factors while the gas cost collections for the period April 2003 through June 2003 are predicated on the amended GCR factors. As shown, April 2003 gas cost collections have been adjusted to reflect the proration of the amended GCR factors approved for gas consumption on or after April 1, 2003.

As shown on Page 1 of Attachment 6, Supply Fixed Cost collections totaled \$32,759,315. Page 2 shows Storage Fixed Cost collections of \$11,657,382, Supply Variable collections of \$121,674,906, Storage Variable Product collections of \$20,836,076, and Storage Variable Non-product collections of \$2,140,121. Thus, gas cost collections were \$189,067,800 for the period July 2002 through June 2003.

Gas costs, gas cost collections, interest, and the beginning deferred balances are summarized on Attachment 7. As shown, the beginning deferred balance was \$555,644 less than forecast. Gas costs were \$39,032,334 greater than forecast while gas cost

collections were \$13,094,561 greater than forecast. Interest on the monthly deferred was \$189,644 greater than forecast.

The \$13,094,561 greater than forecast gas cost collections resulted from greater than forecast sales/FT-2 thru-put. For the twelve months ended June 2003, actual sales/FT-2 thru-put totaled 31,139,396 dths, or 2,578,026 dth greater than forecast, resulting in greater than forecast gas cost collections of \$13,094,561 (see Attachment 8).

The throughput (sales/transportation) variance analysis is presented in Attachment 9. This analysis compares actual and forecast firm thru-put for the twelve months ended June 2003. Of the 2,796,957 dth variance between actual and forecast total throughput, weather accounted for 2,890,516 dth, leaving a weather normalized variance of 93,559 dth less than forecast. In general, greater than forecast number of customers accounted for greater than forecast use of 959,755 dths while less than forecast average use per customer resulted in less than forecast use of 1,053,313 dths.

Attachment 10, pages 1 through 3 presents a summary of the gas cost variance. Page 1 shows total period gas costs were \$39,032,334 greater than forecast. Of this variance, \$365,442 was due to greater than forecast fixed gas costs, \$38,400,678 was due to greater than forecast variable gas costs, while the remainder, or \$266,234 was due to greater than forecast working capital costs, inventory financing costs, and deferred responsibility credits. Pages 2 and 3 of Attachment 10 isolates the price and volume component of the \$38,400,678 greater than forecast variable gas costs. As shown on the bottom of page 3, greater than forecast prices resulted in greater than forecast variable costs of \$19,591,864 while greater than forecast sendout resulted in greater than forecast gas costs of \$18,808,423 (\$516 rounding).

In summary, the \$10,743,042 end-of-period under-collection resulted from greater than forecast gas costs of \$39,032,334, greater than forecast gas cost collections of \$13,094,561, less than forecast beginning deferred balance of \$555,644 and greater than forecast interest of \$189,644. The attached is the first reconciliation of gas costs pursuant to Docket No. 3401. As such, the Company is open to suggestions for data presentation and analysis which would serve to facilitate this process.

Also, pursuant to discussions with the Division and the Commission, enclosed in this filing is a customer rate-class specific deferred gas cost analysis. This analysis is presented in pages 1 through 18 of Attachment 11. This analysis assigns the gas cost deferred balances from the five gas cost "buckets" to the respective customer classes, i.e. Residential and Small C & I class, C & I Medium class, C & I LLF Large class, C & I HLF Large class, C & I LLF Extra-large class and the C & I HLF Extra-large class. By way of organization, the first two pages summarize the responsibility results. Pages three through thirteen reflect the detail supporting the summary results, pages fourteen through sixteen reflects the calculations assigning variable gas costs to the respective customer classes while pages seventeen and eighteen reflects the calculations assigning storage variable gas costs to the respective customer classes.

The Fixed Gas Cost deferred-components (e.g., Supply Fixed, Storage Fixed) were allocated to the above-mentioned customer classes in a manner consistent with the development of the respective GCR rate components. For example, the Supply Fixed Cost Component Factor set forth in the July 1, 2002 GCR was predicated on an allocation of fixed gas costs to the various customer classes based on design winter sales. The projected Residential and Small C & I customer class' design winter sales were 83.4% of total sales. Thus, 83.4% of supply fixed gas costs were allocated to the Residential and Small C & I customer class. Such costs were compared to each customer class' gas cost collections to determine the customer class specific deferred balances.

The Supply Variable Cost deferred balance was allocated to the respective customer classes using a two-step process. First, supply variable gas costs were segregated according to locked and non-locked (page 14). Locked gas costs were allocated to each customer class according to the Company's original monthly sales forecast (pages 14 and 15). Non-locked gas costs were allocated to each customer class according to the difference between actual firm sales and those volumes assigned to the Company's locked purchases (pages 15 and 16). Such customer class specific costs were then compared to collections to determine the customer class specific deferred balance.

Similar to the Supply Variable deferred balance, the Storage Variable Product cost deferred balance was allocated to the respective customer classes using a three-step process. Underground Storage costs were segregated according to (a) sendout consistent with the forecast, or locked, and (b) incremental storage, or underground storage sendout in excess of the forecast. The storage costs consistent with the Company's forecast were allocated similarly to locked Supply Variable Costs (page 15), while allocated according to the same allocators used for assigning non-locked supply variable costs (page 16). LNG and LP costs were assigned to each class on the basis of actual monthly sales.

Accordingly, of the \$(6,518,692) ending deferred Supply Fixed Cost balance, \$(4,893,739) is associated with the Residential and Small C & I class, \$(1,049,081) is associated with C & I Medium, \$(181,062) is associated with C & I LLF Large, \$(219,829) with C & I HLF Large, \$(127,854) with C & I LLF Extra-large, and \$(47,124) with C & I HLF Extra-large.

Of the \$(2,240,080) ending Storage Fixed Cost balance, \$(1,724,348) is associated with the Residential and Small C & I class, \$(102,717) with C & I Medium, \$(8,930) C & I LLF Large, \$(63,982) with C & I HLF Large, \$(44,542) with C & I LLF Extra-large, \$(16,000) with C & I HLF Extra-large and \$(279,561) with FT-2 Marketers. Similar to the allocation of Supply Fixed Gas Costs, Storage Fixed Gas costs were allocated to the respective customer classes based on design winter throughput.

The \$17,196,297 Supply Variable deferred balance consisted of \$11,577,416 assigned to the Residential and Small C & I class, \$3,086,282 assigned to the C & I Medium class, \$541,854 assigned to the C & I LLF Large class, \$1,133,385 assigned to the C & I HLF Large class, \$434,378 assigned to the C & I LLF Extra-large class, and \$422,986 assigned to the C & I HLF Extra-large class.

The \$3,055,265 Storage Variable Product deferred balance consisted of \$3,006,215 assigned to the Residential and Small C & I class, \$179,834 assigned to the C & I Medium class, \$128,848 assigned to the C & I LLF Large class, \$(149,256) assigned to the C & I HLF Large class, \$(37,798) assigned to the C & I LLF Extra-large class, and \$(70,924) assigned to the C & I HLF Extra-large class.

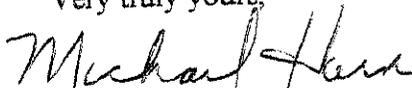

Of the \$(749,747) ending Storage Variable Non-product deferred balance, \$(575,331) is associated with the Residential and Small C & I class, \$(71,753) with C & I Medium, \$(18,734) C & I LLF Large, \$(7,029) with C & I HLF Large, \$(4,655) with C & I LLF Extra-large, \$(5,952) with C & I HLF Extra-large, and \$(66,289) with FT-2 Marketers.

In summary, the assignment of the \$10,743,042 ending deferred balance at June 30, 2003 results in \$7,390,213 to the Residential and Small C & I class, \$2,042,564 to the C & I Medium class, \$459,975 to the C & I LLF Large class, \$693,289 to the C & I HLF Large class, \$219,530 to the C & I LLF Extra-large class, \$282,986 to the C & I HLF Extra-large customer class, and \$(345,850) to FT-2 Marketers.

As with the reconciliation of gas costs, this is the first occasion in the assignment of the gas cost deferred balances to the respective customer classes. The Company is open to suggestions in the presentation of data and analyses to facilitate this effort.

If you have any questions, or need additional information, please do not hesitate to contact me. I can be reached at (401) 574 - 2229.

NATURAL GAS VEHICLE SERVICE
RATE 70

1.0 NATURAL GAS VEHICLE SERVICE

1.1 AVAILABILITY: This rate is available for compressed natural gas dispensed at Company-owned fueling stations for the purpose of fueling natural gas vehicles.

No other use of gas will be included in this rate for billing purposes.

1.2 RATES:

| | |
|----------------------|-------------------------|
| Customer Charge: | \$5.00 per month |
| Energy Charge: | |
| Distribution Charge: | \$0.1697 per Therm |
| Commodity Charge: | \$0.4889-5639 per Therm |

1.3 MINIMUM RATE: Customer Charge

1.4 GENERAL RULES AND REGULATIONS: The Company's General Rules and Regulations in Section 1 of RIPUC NEGC No. 101, as in effect from time-to-time and where not inconsistent with any specific provisions hereof, are a part of this Schedule.

1.5 RHODE ISLAND GROSS EARNINGS TAX: The application of the above rates are subject to the Rhode Island Gross Earnings Tax provisions in Section 1, Schedule D.

2.0 INTERRUPTIBLE NATURAL GAS VEHICLE SERVICE

2.1 AVAILABILITY: Gas service is available under this rate to any customer requiring natural gas as a motor fuel for motor vehicle operations.

Customer must have dual-fuel capability for the use of an alternate fuel which may be substituted for gas when gas is

NATURAL GAS VEHICLE SERVICE
RATE 70

not available under this tariff, or customer must have use of a vehicle powered by an alternate fuel which may be substituted for the NGV vehicle when gas is not available under this tariff.

2.2 RATES:

The interruptible rate shall be set for the upcoming month after 10:30 a.m. five (5) business days prior to the commencement of that month. Upon setting the non-firm service rate, if the Company obtains a new, lower gas supply, the rate may be reduced prior to the first calendar day of the month. The customer must notify the Company by 9:00 a.m. two (2) business days prior to the commencement of that month of the intention to take Interruptible Natural Gas Vehicle Service.

Customer Charge: \$5.00 per month

Energy Charge:

The rate for interruptible service will be equal to the Company's incremental gas cost, \$.085/Therm margin, plus \$.15/Therm for the cost of compression.

2.3 MINIMUM RATE: Customer Charge

2.4 GENERAL RULES AND REGULATIONS:

The Company's General Rules and Regulations in Section 1 of RIPUC NEGC No. 101, as in effect from time-to-time and where not inconsistent with any specific provisions hereof, are a part of this Schedule.

2.5 RHODE ISLAND GROSS EARNINGS TAX:

The application of the above rates are subject to the Rhode Island Gross Earnings Tax provisions in Section 1, Schedule D.

**2.6 NOTIFICATION OF INTERRUPTION/
CURTAILMENT:**

Customer will curtail or discontinue service when, in the sole opinion of the Company, such curtailment or

NATURAL GAS VEHICLE SERVICE
RATE 70

interruption is necessary in order for it to continue to supply the gas requirements of its firm customers at such time.

**2.7 FAILURE TO
CURTAIN:**

For any period that a customer fails to curtail the use of gas as requested by the Company, the rate for gas consumption will be equal to the highest cost gas required to meet demand during the curtailment period, plus \$1.55 per Therm.

GAS COST RECOVERY CLAUSE

1.0 GENERAL:

1.1 Purpose:

The purpose of this clause is to establish procedures that allow the Company, subject to the jurisdiction of the Rhode Island Public Utilities Commission ("RIPUC"), to annually adjust its rates for firm sales and the weighted average cost of upstream pipeline transportation capacity in order to recover the costs of gas supplies, pipeline and storage capacity, production capacity and storage, purchased gas working capital, and to credit supplier refunds, capacity credits from off-system sales and revenues from capacity release transactions. ~~In addition, this clause establishes procedures for calculation of the monthly Transportation to Sales Service (TSS) surcharge/credit.~~

The Gas Cost Recovery Clause shall include all costs of firm gas, including, but not limited to, commodity costs, demand charges, local production and storage costs and other gas supply expense incurred to procure and transport supplies, transportation fees, inventory costs, requirements for purchased gas working capital, all applicable taxes, and deferred gas costs. Any costs recovered through the application of the Gas Charge shall be identified and explained fully in the annual filing.

1.2 Applicability:

The Gas Charge shall be calculated separately for the following rate groups:

- (1) Residential Non-Heating and Heating, and Small C&I;
- (2) Medium C&I;
- (3) Large C&I Low Load Factor;
- (4) Large C&I High Load Factor;
- (5) Extra Large C&I Low Load Factor;
- (6) Extra Large C&I High Load Factor, and;
- (7) FT-2 Firm Transportation – Marketers

22226222

Issued: June 14, 2002 DRAFT July 2 August 26,

2003

G:\PRICSHAR\DKt 3436\GCR-Nov2003\Section 2 marked.doc

Effective: ~~These rates will be applied starting with billing cycle 1, July 1, 2002~~
September 2, 2003

GAS COST RECOVERY CLAUSE

The Company will make annual Gas Charge filings based on forecasts of applicable costs and volumes and annual Reconciliation filings based on actual costs and volumes. The Gas Charge shall become effective ~~with on-the-first-billing~~ ~~eye~~consumption as of November 1st as designated by the Company. In the event of any change subsequent to the November effective date which would cause the estimate of the Deferred Gas Cost Balance to differ from zero by an amount greater than one (1) percent of the Company's gas revenues, the Company may make a Gas Charge filing designed to eliminate that non-zero balance.

Unless otherwise notified by the RIPUC, the Company shall submit the Gas Charge filings no later than 60 days before they are scheduled to take effect. The Annual Reconciliation filing will be made by August 1 of each year containing actual data for the twelve months ending June 30 of that year.

~~The TSS monthly surcharge/credit is applicable to sales service customers that switch from transportation service to sales service under the provisions in Section 6, Schedule C Item 1.02.1. Such surcharge/credit is to reflect the difference between the Gas Purchasing Program cost of gas reflected in the currently effective GCR rate and a market based price. The TSS surcharge/credit shall apply to all sales service consumption from September 1st through April 30th. See Item 9.0 for additional information and calculation.~~

2.0 GAS CHARGE FACTORS

2.1 Gas Charges to Sales

Customers:

The Gas Charge consists of four (4) components: (1) Supply Fixed Costs, (2) Storage Fixed Costs, (3) Storage Variable Costs, and (4) Supply Variable Costs. These components shall be computed using a forecast of applicable costs and volumes for each firm rate schedule based on the following formula:

22226222

Issued: June 14, 2002 DRAFT July 2 August 26,
2003

G:\PRICSHAR\Dkt 3436\GCR-Nov2003\Section 2 marked.doc

Effective: These rates will be applied
starting with billing cycle 1, July 1, 2002
September 2, 2003

GAS COST RECOVERY CLAUSE

$$GC_S = FC_S + SFC_S + SVC_S + VC_S$$

Where:

- GC_S Gas Charge applicable to Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, and Extra Large Low and High Load C&I sales.
- FC_S Supply Fixed Cost Component for a rate classification. See Item 3.1 for calculation.
- SFC_S Storage Fixed Cost Component for a rate classification. See Item 3.2 for calculation.
- SVC_S Storage Variable Cost Component for a rate classification. See Item 3.3 for calculation.
- VC_S Supply Variable Cost Component for a rate classification. See Item 3.4 for calculation.

This calculation will be adjusted for the uncollectible percentage approved in the most recent rate case proceeding and the Gas Charges to Sales Customers are subject to the Rhode Island Gross Earnings Tax provisions in Section 1, Schedule D.

2.2 Gas Charge to FT-2

Marketers:

The FT-2 Firm Transportation Marketer Gas Charge (GC_M) recovers costs associated with storage and peaking resources and is calculated as follows:

$$GC_M = SFC_S + SVC_S$$

Where:

22226222

GAS COST RECOVERY CLAUSE

| | |
|------------------|---|
| GC _M | Gas Charge applicable to Marketers for FT-2 Firm Transportation Service |
| SFC _S | Storage Fixed Cost Component. See Item 3.2 for calculation. |
| SVC _S | Storage Variable Cost Component. See Item 3.3 for calculation. |

3.0 GAS CHARGE CALCULATIONS

3.1 Supply Fixed Cost

Component:

The Supply Fixed Cost Component shall include all fixed costs related to the purchase of firm gas, including, but not limited to, pipeline and supplier fixed reservation costs, demand charges, and other gas supply expense incurred to transport supplies, transportation fees, and requirements for purchased gas working capital. Any costs recovered through the application of the Supply Fixed Cost Component shall be identified and explained fully in the annual filing.

The Supply Fixed Cost Component is calculated for each applicable rate schedule as follows:

$$FC_S = \frac{DWS_S * (TC_{FC} - TR_{FC} + WC_{FC} + R_{FC})}{Dt_S}$$

Where:

FC_S Supply Fixed Cost Component for Residential Non-Heating, Residential Heating, Small C&I, Medium

September 2, 2003

GAS COST RECOVERY CLAUSE

Company's Distribution System, and requirements for purchased gas working capital. Any costs recovered through the application of the Storage Fixed Cost Component shall be identified and explained fully in the annual filing.

The Storage Fixed Cost Component is calculated for each applicable rate schedule as follows:

$$SFC_S = \frac{DWT_S * (TC_{SFC} - TR_{SFC} + WC_{SFC} + R_{SFC})}{D_{ts}}$$

Where:

- SFC_S** Storage Fixed Cost Component for Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, Extra Large Low and High Load C&I or FT-2 service.
- DWT_S** Percent of Design Winter Throughput (November - March) for Residential Non-Heating Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, Extra Large Low and High Load C&I, or FT-2 service.
- TC_{SFC}** Total Fixed Storage Costs, all fixed costs, including, but not limited to supply related local production and storage costs, and taxes on storage. The level of supply related local production and storage costs shall be as determined in most recent rate case proceeding.
- TR_{SFC}** Total Credits to Storage Fixed Costs

22226222

GAS COST RECOVERY CLAUSE

- WC_{SFC} Working Capital requirements associated with Total Storage Fixed Costs. See Item 5.0 for calculation.
- R_{SFC} Deferred Storage Cost Account Balance as of October 31~~September 30~~, as derived in Item 6.0 plus any Asset Management Incentive associated with the Gas Procurement and Asset Management Incentive Plan.
- Dt_S Forecast of annual sales related to Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, Extra Large Low and High Load C&I and throughput related to FT-2 service.

3.3 Supply Variable Cost

Component:

The Supply Variable Cost Component shall include all variable costs of firm gas, including, but not limited to, commodity costs, taxes on commodity and other gas supply expense incurred to transport supplies, transportation fees, inventory commodity costs and requirements for purchased gas working capital. Any costs recovered through the application of the Supply Variable Cost Component shall be identified and explained fully in the annual filing.

The Supply Variable Cost Component is calculated for each applicable rate schedule as follows:

$$VC = \frac{TC_{VC} - TR_{VC} + WC_{VC} + R_V}{Dt_{VC}}$$

Where:

VC Supply Variable Cost Component for Residential Non-Heating, Residential Heating, Small C&I, Medium

| | C&I, Large Low and High Load C&I, or Extra Large Low and High Load C&I. |
| TC _{vc} | Total Supply Variable Costs, including, but not limited to pipeline, storage and supplier, and commodity-billed pipeline transition costs. |
| TR _{vc} | Total Credits to Supply Variable Costs, including, but not limited to balancing commodity charge revenues and transportation imbalance charges. |
| WC _{vc} | Working Capital requirements associated with Total Supply Variable Costs. See item 5.0 for calculation. |
| R _v | Deferred Cost Account Balance as of September 30 <u>October 31</u> , as derived in Item 6.0 <u>plus the net of any Gas Procurement Incentives/Penalties associated with the Gas Procurement and Asset Management Incentive Plan.</u> |
| Dt _{vc} | Forecast of annual sales to Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, and Extra Large Low and High Load C&I. |

3.4 Storage Variable Cost

Component:

The Storage Variable Cost Component shall include all variable costs related to the operations, maintenance and delivery of storage, including, but not limited to, supply related portion of local production and storage costs as determined in the most recent rate case proceeding, inventory financing costs, injection and withdrawal costs, taxes on storage, delivery of storage gas to the Company's Distribution System, and requirements for purchased gas working capital. Any costs recovered through the application of the Storage Variable Cost Component shall be identified and explained fully in the annual filing.

September 2, 2003

GAS COST RECOVERY CLAUSE

- R_{svc} Deferred Storage Variable Cost Account Balance as of ~~September 30~~October 31, as derived in Item 6.0.
- D_{tx} Forecast of annual sales related to Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, Extra Large Low and High Load C&I and throughput related to FT-2 service.

4.0 POOL BALANCING

- 4.1 Purpose:** This section establishes a procedure to allow the Company, subject to the jurisdiction of the RIPUC, to adjust on an annual basis its rates for firm pool balancing service set forth in Section 6, Schedule C, Item 5.04 of RIPUC NEGC No. 101

- 4.2 Calculation:** $BAL = (FC + SFC + SVC) * 1\%$

Where:

- BAL Balancing Charge for Pool Balancing Service applicable to Marketer pool throughput per percent of balancing service elected.
- FC Fixed Cost Component as calculated in Item 3.1 above.
- SFC Storage Fixed Cost Component as calculated in Item 3.2 above.
- SVC Storage Variable Cost Component as calculated in Item 3.3 above.

5.0 WORKING CAPITAL REQUIREMENT:

$$WC_M = WCA_M * [DL / 365] * COC$$

22226222

Issued: ~~June 14, 2002~~DRAFT July 2 August 26, 2003

G:\PRICSHAR\DKt 3436\GCR-Nov2003\Section 2 marked.doc

Effective: These rates will be applied starting with billing cycle 1, July 1, 2002 September 2, 2003

GAS COST RECOVERY CLAUSE

Where:

- WC_M Working Capital requirements of Supply Fixed (WC_{FC}), Storage Fixed (WC_{SFC}), Storage Variable (WC_{SVC}) or Supply Variable (WC_{VC}) Cost Components.
- WCA_M Working Capital Allowed in the Supply Fixed, Storage Fixed, Storage Variable, or Variable Cost component calculations.
- DL Days Lag approved in the most recent rate case proceeding.
- COC Weighted Pre-tax Cost of Capital approved in the most recent rate case proceeding.

**6.0 DEFERRED GAS
COST ACCOUNT:**

The Company shall maintain four (4) separate Deferred Cost Accounts: (1) Supply Fixed Costs and revenues, (2) Storage Fixed Costs and revenues, (3) Storage Variable Costs and revenues, and (4) Supply Variable Costs and revenues. Entries shall be made to each of these accounts at the end of each month as follows:

An amount equal to the allowable costs incurred, less:

1. Gas Revenues collected adjusted for the RIGET and uncollectible % approved in the most recent rate case proceeding;
2. Credits to costs
3. Monthly interest based on a monthly rate of the current Fleet prime interest rate less 200 basis points (2%), multiplied by the arithmetic average of the account's beginning-of-the-month balance and the balance after entries 1. and 2. above.

22226222

GAS COST RECOVERY CLAUSE

7.0 REFUNDS

7.1 During Refund Period

If the Company receives a cash refund resulting from gas supply overcharges during a historical "refund period," where the historical "refund period" is the most recent 60-month period, and the amount of the refund equals or exceeds 2% of the Company's total gas costs for the prior fiscal year, the amount to be refunded to any firm customer who used gas during the refund period and who is not on the suspended debt file shall be equal to:

The customers billed usage during Refund Period X

Amount to be Refunded
Firm Sales during Refund Period

Where the Amount to be Refunded equals Total Amount of Refund minus the incremental costs incurred by the Company in effecting the distribution of the supplier refund.

The customer shall receive this amount in the form of:

1. A lump-sum bill credit if the customer's account is active or if the customer's final bill has not been paid; or
2. A personal check if the customers account is closed and paid in full and the amount of the check exceeds \$25; or
3. A combination bill credit/personal check if the amount of the credit exceeds the unpaid balance of the customer's final bill.

The total amount of individually calculated refunds of \$2 or less to have been paid by check will be credited to the Deferred Gas Cost Account. Checks which are not deliverable or paid within 90 days of the mailing shall be canceled and also credited to the Deferred Gas Cost Account.

22226222

Issued: ~~June 14, 2002~~DRAFT July 2 August 26,
2003

G:\PRICSHAR\Dkt 3436\GCR-Nov2003\Section 2 marked.doc

Effective: ~~These rates will be applied~~
~~starting with billing cycle 1, July 1, 2002~~
September 2, 2003

GAS COST RECOVERY CLAUSE

Should any canceled refund checks later become a liability of the Company, the cost shall be debited to the Deferred Gas Cost Account.

7.2 Prior To Refund Period:

If the Company receives a cash refund resulting from gas supply overcharges during periods prior to the historical refund period, then the refund shall be credited to the appropriate Deferred Cost Account.

7.3 Less Than 2%

If the amount of the refund is less than 2% of the Company's total gas cost for the prior fiscal year, it shall be credited to the appropriate Deferred Cost Account.

8.0 WEIGHTED AVERAGE UPSTREAM PIPELINE TRANSPORTATION COST

On or about June 1, the Company shall provide to marketers and the Division a preliminary update of its pipeline path costs and weighted system-wide average costs including supporting schedules that show the assumptions and methodologies used to develop the rates. Concurrent with the annual GCR filing, the Company shall calculate the final weighted average cost of upstream pipeline transportation capacity. The cost shall be applicable to capacity release under the Transportation Terms and Conditions effective November 1 of each year

9.0 ~~TRANSPORTATION TO SALES SERVICE~~

9.1 ~~Description:~~ ~~The Transportation to Sales Service (TSS) monthly surcharge/credit is designed to charge a market-based price reflecting the cost of gas supplies in the marketplace at the time consumption is occurring for the incremental amount of gas that the Company must buy outside of quantities purchased under the~~

22226222

GAS COST RECOVERY CLAUSE

~~Gas Procurement Incentive Program (GPIP). The TSS surcharge/credit shall apply to all firm sales service consumption of customers switching to sales service from transportation service during the period September 1st through the following April 30th. Customers subject to TSS who remain on firm sales service after April 30th shall no longer be subject to the TSS surcharge/credit as of May 1st. Nothing in this provision restricts a customer's ability to switch from firm sales service back to transportation service.~~

~~The TSS monthly surcharge/credit will be calculated at the start of each month from September through April and posted on the Company's website by the 2nd business day of the month. Supporting calculations will be included in the Company's annual GCR Reconciliation filing.~~

~~9.2 Calculation: $TSS = [(NYMEX_M - GPIP_M) (GPIP_{QM} / Dt_M)] R_{GCR}$~~

Where:

~~TSS~~ — ~~Transportation to Sales Service monthly surcharge/credit~~

~~NYMEX_M~~ — ~~NYMEX closing price for month M~~

~~GPIP_M~~ — ~~Average cost of gas purchased under the GPIP for month M~~

~~GPIP_{QM}~~ — ~~Total quantity of GPIP purchases for month M~~

~~Dt_M~~ — ~~Total forecasted sales for month M underlying the GPIP~~

~~R_{GCR}~~ — ~~Per Dt Deferred Gas Cost Reconciliation reflected in the current GCR charge~~

Issued: June 14, 2002 DRAFT July 2 August 26, 2003

G:\PRICSHAR\Dkt 3436\GCR-Nov2003\Section 2 marked.doc

Effective: These rates will be applied starting with billing cycle 1, July 1, 2002 September 2, 2003

GAS COST RECOVERY CLAUSE

1.0 GENERAL:

1.1 Purpose:

The purpose of this clause is to establish procedures that allow the Company, subject to the jurisdiction of the Rhode Island Public Utilities Commission ("RIPUC"), to annually adjust its rates for firm sales and the weighted average cost of upstream pipeline transportation capacity in order to recover the costs of gas supplies, pipeline and storage capacity, production capacity and storage, purchased gas working capital, and to credit supplier refunds, capacity credits from off-system sales and revenues from capacity release transactions.

The Gas Cost Recovery Clause shall include all costs of firm gas, including, but not limited to, commodity costs, demand charges, local production and storage costs and other gas supply expense incurred to procure and transport supplies, transportation fees, inventory costs, requirements for purchased gas working capital, all applicable taxes, and deferred gas costs. Any costs recovered through the application of the Gas Charge shall be identified and explained fully in the annual filing.

1.2 Applicability:

The Gas Charge shall be calculated separately for the following rate groups:

- (1) Residential Non-Heating and Heating, and Small C&I;
- (2) Medium C&I;
- (3) Large C&I Low Load Factor;
- (4) Large C&I High Load Factor;
- (5) Extra Large C&I Low Load Factor;
- (6) Extra Large C&I High Load Factor, and;
- (7) FT-2 Firm Transportation – Marketers

The Company will make annual Gas Charge filings based on forecasts of applicable costs and volumes and annual Reconciliation filings based on actual costs and volumes. The Gas Charge shall become effective with consumption as of November 1st as designated by the Company. In the event of any change subsequent to the November effective date which would cause the

22226222

GAS COST RECOVERY CLAUSE

estimate of the Deferred Gas Cost Balance to differ from zero by an amount greater than one (1) percent of the Company's gas revenues, the Company may make a Gas Charge filing designed to eliminate that non-zero balance.

Unless otherwise notified by the RIPUC, the Company shall submit the Gas Charge filings no later than 60 days before they are scheduled to take effect. The Annual Reconciliation filing will be made by August 1 of each year containing actual data for the twelve months ending June 30 of that year.

2.0 GAS CHARGE FACTORS

2.1 Gas Charges to Sales

Customers:

The Gas Charge consists of four (4) components: (1) Supply Fixed Costs, (2) Storage Fixed Costs, (3) Storage Variable Costs, and (4) Supply Variable Costs. These components shall be computed using a forecast of applicable costs and volumes for each firm rate schedule based on the following formula:

$$GC_s = FC_s + SFC_s + SVC_s + VC_s$$

Where:

GC_s Gas Charge applicable to Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, and Extra Large Low and High Load C&I sales.

FC_s Supply Fixed Cost Component for a rate classification. See Item 3.1 for calculation.

SFC_s Storage Fixed Cost Component for a rate classification. See Item 3.2 for calculation.

GAS COST RECOVERY CLAUSE

SVC_S Storage Variable Cost Component for a rate classification. See Item 3.3 for calculation.

VC_S Supply Variable Cost Component for a rate classification. See Item 3.4 for calculation.

This calculation will be adjusted for the uncollectible percentage approved in the most recent rate case proceeding and the Gas Charges to Sales Customers are subject to the Rhode Island Gross Earnings Tax provisions in Section 1, Schedule D.

2.2 Gas Charge to FT-2

Marketers:

The FT-2 Firm Transportation Marketer Gas Charge (GC_M) recovers costs associated with storage and peaking resources and is calculated as follows:

$$GC_M = SFC_S + SVC_S$$

Where:

GC_M Gas Charge applicable to Marketers for FT-2 Firm Transportation Service

SFC_S Storage Fixed Cost Component. See Item 3.2 for calculation.

SVC_S Storage Variable Cost Component. See Item 3.3 for calculation.

3.0 GAS CHARGE CALCULATIONS

3.1 Supply Fixed Cost

Component:

The Supply Fixed Cost Component shall include all fixed costs related to the purchase of firm gas, including, but not limited to, pipeline and supplier fixed reservation costs, demand charges, and other gas supply expense incurred to transport supplies, transportation fees, and requirements for purchased gas working capital. Any costs recovered through the application of the Supply

22226222

GAS COST RECOVERY CLAUSE

Fixed Cost Component shall be identified and explained fully in the annual filing.

The Supply Fixed Cost Component is calculated for each applicable rate schedule as follows:

$$FC_S = \frac{DWS_S * (TC_{FC} - TR_{FC} + WC_{FC} + R_{FC})}{D_{iS}}$$

Where:

- FC_S Supply Fixed Cost Component for Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I or Extra Large Low and High Load C&I.
- DWS_S Percent of Design Winter Sales (November - March) for Residential Non-Heating Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I or Extra Large Low and High Load C&I.
- TC_{FC} Total Supply Fixed Costs, including, but not limited to pipeline and supplier reservation and inventory financing charges.
- TR_{FC} Credits to Supply Fixed Costs relating to supply services, including, but not limited to balancing charge revenues, capacity release revenues, off-system sales margins and refunds.
- WC_{FC} Working Capital requirements associated with Supply Fixed Costs. See Item 5.0 for calculation.
- R_{FC} Deferred Fixed Cost Account Balance as of October 31, as derived in Item 6.0 plus any Asset Management Incentive associated with the Gas Procurement and Asset Management Incentive Plan.

22226222

GAS COST RECOVERY CLAUSE

D_{ts} Forecast of annual sales to Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, and Extra Large Low and High Load C&I.

3.2 Storage Fixed Cost

Component:

The Storage Fixed Cost Component shall include all fixed costs related to the operations, maintenance and delivery of storage, including, but not limited to, supply related portion of local production and storage costs as determined in the most recent rate case proceeding, taxes on storage, delivery of storage gas to the Company's Distribution System, and requirements for purchased gas working capital. Any costs recovered through the application of the Storage Fixed Cost Component shall be identified and explained fully in the annual filing.

The Storage Fixed Cost Component is calculated for each applicable rate schedule as follows:

$$SFC_S = \frac{DWT_S * (TC_{SFC} - TR_{SFC} + WC_{SFC} + R_{SFC})}{D_{ts}}$$

Where:

SFC_S Storage Fixed Cost Component for Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, Extra Large Low and High Load C&I or FT-2 service.

DWT_S Percent of Design Winter Throughput (November - March) for Residential Non-Heating Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, Extra Large Low and High Load C&I, or FT-2 service.

GAS COST RECOVERY CLAUSE

- TC_{SFC} Total Fixed Storage Costs, all fixed costs, including, but not limited to supply related local production and storage costs, and taxes on storage. The level of supply related local production and storage costs shall be as determined in most recent rate case proceeding.
- TFR_{SFC} Total Credits to Storage Fixed Costs
- WC_{SFC} Working Capital requirements associated with Total Storage Fixed Costs. See Item 5.0 for calculation.
- R_{SFC} Deferred Storage Cost Account Balance as of October 31, as derived in Item 6.0 plus any Asset Management Incentive associated with the Gas Procurement and Asset Management Incentive Plan.
- Dt_S Forecast of annual sales related to Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, Extra Large Low and High Load C&I and throughput related to FT-2 service.

3.3 Supply Variable Cost

Component:

The Supply Variable Cost Component shall include all variable costs of firm gas, including, but not limited to, commodity costs, taxes on commodity and other gas supply expense incurred to transport supplies, transportation fees, inventory commodity costs and requirements for purchased gas working capital. Any costs recovered through the application of the Supply Variable Cost Component shall be identified and explained fully in the annual filing.

The Supply Variable Cost Component is calculated for each applicable rate schedule as follows:

$$VC = \frac{TC_{VC} - TR_{VC} + WC_{VC} + R_V}{Dt_{VC}}$$

GAS COST RECOVERY CLAUSE

Where:

- VC Supply Variable Cost Component for Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, or Extra Large Low and High Load C&I.
- TC_{VC} Total Supply Variable Costs, including, but not limited to pipeline, storage and supplier, and commodity-billed pipeline transition costs.
- TR_{VC} Total Credits to Supply Variable Costs, including, but not limited to balancing commodity charge revenues and transportation imbalance charges.
- WC_{VC} Working Capital requirements associated with Total Supply Variable Costs. See item 5.0 for calculation.
- R_V Deferred Cost Account Balance as of October 31, as derived in Item 6.0 plus the net of any Gas Procurement Incentives/Penalties associated with the Gas Procurement and Asset Management Incentive Plan.
- Dt_{VC} Forecast of annual sales to Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, and Extra Large Low and High Load C&I.

3.4 Storage Variable Cost

Component:

The Storage Variable Cost Component shall include all variable costs related to the operations, maintenance and delivery of storage, including, but not limited to, supply related portion of local production and storage costs as determined in the most recent rate case proceeding, inventory financing costs, injection and withdrawal costs, taxes on storage, delivery of storage gas to the Company's Distribution System, and requirements for purchased gas working capital. Any costs recovered through the application

22226222

GAS COST RECOVERY CLAUSE

of the Storage Variable Cost Component shall be identified and explained fully in the annual filing.

The Storage Variable Cost Component is calculated for each applicable rate schedule as follows:

$$SVC_s = \frac{DWT_s * (TC_{SVC} - TR_{SVC} + WC_{SVC} + R_{SVC})}{Dt_s}$$

Where:

- SVC_s** Storage Variable Cost Component for Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, Extra Large Low and High Load C&I or FT-2 service.
- DWT_s** Percent of Design Winter Throughput (November - March) for Residential Non-Heating Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I, Extra Large Low and High Load C&I, or FT-2 service.
- TC_{SVC}** Total Storage Variable Costs, all variable costs, including, but not limited to supply related local production and storage costs, inventory financing costs, injection and withdrawal costs, and taxes on storage. The level of supply related local production and storage costs shall be as determined in most recent rate case proceeding.
- TR_{SVC}** Total Credits to Storage Variable Costs
- WC_{SVC}** Working Capital requirements associated with Total Storage Variable Gas Costs. See Item 5.0 for calculation.

GAS COST RECOVERY CLAUSE

R_{SVC} Deferred Storage Variable Cost Account Balance as of October 31, as derived in Item 6.0.

Dt_x Forecast of annual sales related to Residential Non-Heating, Residential Heating, Small C&I, Medium C&I, Large Low and High Load C&I. Extra Large Low and High Load C&I and throughput related to FT-2 service.

4.0 POOL BALANCING

4.1 Purpose: This section establishes a procedure to allow the Company, subject to the jurisdiction of the RIPUC, to adjust on an annual basis its rates for firm pool balancing service set forth in Section 6, Schedule C, Item 5.04 of RIPUC NEGC No. 101

4.2 Calculation: $BAL = (FC + SFC + SVC) * 1\%$

Where:

BAL Balancing Charge for Pool Balancing Service applicable to Marketer pool throughput per percent of balancing service elected.

FC Fixed Cost Component as calculated in Item 3.1 above.

SFC Storage Fixed Cost Component as calculated in Item 3.2 above.

SVC Storage Variable Cost Component as calculated in Item 3.3 above.

5.0 WORKING CAPITAL REQUIREMENT:

$WC_M = WCA_M * [DL / 365] * COC$

Where:

22226222

GAS COST RECOVERY CLAUSE

- WC_M Working Capital requirements of Supply Fixed (WC_{FC}), Storage Fixed (WC_{SFC}), Storage Variable (WC_{SVC}) or Supply Variable (WC_{VC}) Cost Components.
- WCA_M Working Capital Allowed in the Supply Fixed, Storage Fixed, Storage Variable, or Variable Cost component calculations.
- DL Days Lag approved in the most recent rate case proceeding.
- COC Weighted Pre-tax Cost of Capital approved in the most recent rate case proceeding.

6.0 DEFERRED GAS COST ACCOUNT:

The Company shall maintain four (4) separate Deferred Cost Accounts: (1) Supply Fixed Costs and revenues, (2) Storage Fixed Costs and revenues, (3) Storage Variable Costs and revenues, and (4) Supply Variable Costs and revenues. Entries shall be made to each of these accounts at the end of each month as follows:

An amount equal to the allowable costs incurred, less:

1. Gas Revenues collected adjusted for the RIGET and uncollectible % approved in the most recent rate case proceeding;
2. Credits to costs
3. Monthly interest based on a monthly rate of the current Fleet prime interest rate less 200 basis points (2%), multiplied by the arithmetic average of the account's beginning-of-the-month balance and the balance after entries 1. and 2. above.

7.0 REFUNDS

7.1 During Refund Period

If the Company receives a cash refund resulting from gas supply overcharges during a historical "refund period," where the

22226222

GAS COST RECOVERY CLAUSE

historical "refund period" is the most recent 60-month period, and the amount of the refund equals or exceeds 2% of the Company's total gas costs for the prior fiscal year, the amount to be refunded to any firm customer who used gas during the refund period and who is not on the suspended debt file shall be equal to:

The customers billed usage during Refund Period X

Amount to be Refunded
Firm Sales during Refund Period

Where the Amount to be Refunded equals Total Amount of Refund minus the incremental costs incurred by the Company in effecting the distribution of the supplier refund.

The customer shall receive this amount in the form of:

1. A lump-sum bill credit if the customer's account is active or if the customer's final bill has not been paid; or
2. A personal check if the customer's account is closed and paid in full and the amount of the check exceeds \$25; or
3. A combination bill credit/personal check if the amount of the credit exceeds the unpaid balance of the customer's final bill.

The total amount of individually calculated refunds of \$2 or less to have been paid by check will be credited to the Deferred Gas Cost Account. Checks which are not deliverable or paid within 90 days of the mailing shall be canceled and also credited to the Deferred Gas Cost Account.

Should any canceled refund checks later become a liability of the Company, the cost shall be debited to the Deferred Gas Cost Account.

**7.2 Prior To Refund
Period:**

If the Company receives a cash refund resulting from gas supply overcharges during periods prior to the historical refund period,

22226222

GAS COST RECOVERY CLAUSE

then the refund shall be credited to the appropriate Deferred Cost Account.

- 7.3 **Less Than 2%** If the amount of the refund is less than 2% of the Company's total gas cost for the prior fiscal year, it shall be credited to the appropriate Deferred Cost Account.

**8.0 WEIGHTED AVERAGE UPSTREAM
PIPELINE TRANSPORTATION COST**

On or about June 1, the Company shall provide to marketers and the Division a preliminary update of its pipeline path costs and weighted system-wide average costs including supporting schedules that show the assumptions and methodologies used to develop the rates. Concurrent with the annual GCR filing, the Company shall calculate the final weighted average cost of upstream pipeline transportation capacity. The cost shall be applicable to capacity release under the Transportation Terms and Conditions effective November 1 of each year
